

MODEL: COVERALL TYPE 5/6

COVERALLS TYPE 5/6 DISPOSABLE

Disposable Type 5/6 protective coveralls for spray painting, cleaning, and general contamination-control work — a hooded, full-body barrier you can put on and dispose of without a second thought.

KEY FEATURES

- Microporous fabric blocks dust and light liquid splash while staying breathable
- Attached hood for full head coverage
- Elasticated cuffs, waist, and ankles for a secure fit
- Type 5/6 rated for particulate and limited liquid protection

SIZING & FIT: Sized like standard hi-vis workwear. If you'll be layering this over a jacket, fleece, or coveralls, sizing up one size keeps it comfortable rather than tight.

CARE: These are single-use coveralls — discard after each use. Do not launder or reuse, as washing breaks down the microporous barrier.

IDEAL FOR

Spray painting, insulation removal, mold clean-up prep, pest control

PACKING

1 up to 5 coveralls

SIZES AVAILABLE

Medium (8) to 2XL (11)
