

MODEL: SLEEVE-CUT5

CUT/HEAT/SLASH RESISTANT ARM SLEEVES (18")

Lightweight cut-resistant arm sleeves with a thumb hole to keep them in place - extra protection for forearms during glass handling, automotive work, and any job where sleeves alone won't cut it.

KEY FEATURES

- Cut-resistant knit construction
- Thumb hole keeps sleeves from riding up during work
- Lightweight and breathable for all-day wear

SIZING & FIT: One length (18") fits most adults from wrist past the elbow. The thumb hole keeps the sleeve from sliding down during work — no sizing chart needed.

CARE: Hand wash in cool water and air dry flat. Avoid bleach or fabric softener, which weaken the cut-resistant knit fibers.

IDEAL FOR

Glass & sheet metal handling • Meat processing • Recycling
