

MODEL: WELD-RE

WELDING GLOVES (RED LEATHER, HEAT RESISTANT)

A heavy-duty welding gauntlet glove in red leather, built to handle sparks, heat, and abrasion during welding and metal work.

KEY FEATURES

- Full leather construction for heat and flame resistance
- Fully welted seams for reinforced seam strength
- Extended gauntlet cuff lined with flame-retardant material
- EN 388 rated: Abrasion 4, Cut 1, Tear 4, Puncture 3
- EN 407 rated for heat resistance

SIZING & FIT: This style comes in one size (XL), fitted for an average-to-large adult hand. If you typically wear a Small or Medium glove, check with us before ordering bulk quantities.

CARE: Brush off spatter and let cool before storing. Condition the leather periodically to keep it supple, and inspect the welted seams and gauntlet lining before each use for heat damage.
